Latvia in Facts

International memberships: EU and NATO since 2004, WTO since 1998

Capital: Riga

Other major cities: Daugavpils, Liepāja, Jelgava, Jūrmala, Ventspils

Population (as of 1st January, 2014): 2.0 million

Area: 64 573 km²

Language: Latvian (official); Russian, English and German are also widely spoken

Currency: euro (EUR)

GDP growth (2013): 4.2%

GDP in current prices (2013): EUR 23.222 billion

GDP per capita (2013): EUR 11 537

FDI stock (2013): EUR 11.570 billion

FDI stock per capita (2013): EUR 5 781

The construction sector, which includes the manufacturing of building materials and construction services, has always been an important driving force for the national economy.

The combination of high quality and competitive prices has allowed a significant number of Latvian manufacturers and construction companies to operate in international markets. Consequently, some Latvian companies have developed their export skills to such a high level that almost all of their production is sold abroad. The largest export markets for building materials and the construction industry are the Baltic Sea region, including the Scandinavian countries, and Western Europe.

Complemented by Latvia’s strong engineering traditions, the sector has also succeeded in attracting significant foreign investment to develop local technologies in the manufacture of modern, innovative and high-quality materials. Most Latvian manufacturers use local raw materials, and all products are certified in accordance with Latvian and EU standards.

This catalogue presents information about the leading companies and products in the Latvian construction and building material sector. It is my firm belief that this publication will create even greater interest among potential importers, distributors and users of Latvian building products, as well as partners for our construction companies. I am confident that it will result in successful cooperation between Latvian and foreign companies in this sector.

This is an ideal time to establish partnerships with Latvian construction companies and manufacturers of building materials and to develop long-term collaborations. We at the Investment and Development Agency of Latvia (LIAA) will also be glad to help you identify and benefit from opportunities in the construction and building material manufacturing sectors.

Andris Ozols
Director
Investment and Development Agency of Latvia
The construction sector in Latvia, just like the EU and global construction industries, is undergoing significant change. In 2013, the construction sector represented 6.4% of GDP. There are new requirements relating to environmental protection, energy efficiency, heritage preservation, and adaptation to contemporary living. Latvian construction companies have proven their competitiveness in foreign markets and work well on different scale projects, ranging from general construction to specific installation works. At the same time Latvian manufacturers of construction materials have also become well known for high quality and competitive pricing.

**CONSTRUCTION VOLUMES**

In 2013, the value of construction volume (at current prices) comprised EUR 1.7 billion. In comparison with 2012, volume increased by 10%; more specifically, building construction grew by 8% and construction of civil engineering works by 17%.

**Dynamics of construction sectors by production volume, billion EUR**

![Graph showing dynamics of construction sectors by production volume](source)

Source: Central Statistical Bureau of Latvia

The most notable increase in construction and maintenance, when compared to the corresponding period in the previous year, was recorded in the construction of residential buildings. Construction of infrastructure also experienced growth in Latvia in recent years. 80–200 km of new roads were built, or existing roads reconstructed, each year during the period from 2006 to 2013.

**Proportion of construction by sector**

![Proportion of construction by sector](source)

Source: Central Statistical Bureau of Latvia

Most of Latvia’s construction production in 2013 consisted of building engineering structures (59%) and non-residential buildings (30%). Construction of residential buildings in 2013 represented 11%. Construction management authorities granted 5,178 building permits in 2013 for the construction of, capital repairs to, reconstruction, and restoration of single-occupation dwellings for a total floor space of 3.24 million m². 447 building permits were granted for the construction of industrial buildings and warehouses for a total floor space of 768.5 thousand m².

**CONSTRUCTION COSTS**

Construction costs fell sharply, by 56%, during the period 2008 to 2010 as a result of the global financial crisis. Although construction costs have increased slightly in the last three years, they remain highly competitive. Compared to the average level in 2010, construction costs increased by 11.8% on average in 2013 according to Central Statistical Bureau data. The most notable growth among the main resource groups was registered for maintenance and operational costs of machinery.

The most notable growth among the main resource groups was registered for maintenance and operational costs of machinery.
Three of these establishments – Riga Technical University, Riga Construction College and the Riga International School of Economics and Business Administration – also offer architectural studies. In the 2013/2014 academic year, 1 269 students graduated from these institutions, while a total of 3 774 students continue their higher education in construction and construction-related study programmes.

**MANUFACTURING OF BUILDING MATERIALS**

Most companies producing building materials use local natural resources, mostly mineral materials such as dolomite, limestone and clay. The main product groups are inert materials, concrete, reinforced concrete, cement, heat-insulation materials, lime and dolomite materials, gypsum products, ceramic materials, silicate and anticorrosion materials, glass-fibre products, dry mixtures, aerated concrete, construction chemicals, and metal fittings. In 2013, the total turnover of non-metal mineral production was EUR 452 million. The largest number (140) of producers of building materials are engaged in manufacturing concrete, cement, and gypsum products; 48 companies were manufacturing glass products; and 54 manufactured various porcelain and ceramic products.

**Export of construction services in 2013**

![Graph showing export distribution](image)

**EDUCATION IN CONSTRUCTION**

Education in construction is mainly provided by four Latvian education institutions: Riga Technical University, the Latvian University of Agriculture, Riga Technical College and the Riga International School of Economics and Business Administration.

**IMPORTED CONSTRUCTION MATERIALS**

There are a few product groups that are not manufactured in Latvia, such as glass and mineral wool, even though raw materials are available locally and demand is high. In order to increase the output of local building-material production, and to decrease the construction industry’s dependence on imported materials in these sectors, there is potential for industry

In 2013, there were around 400 companies in Latvia producing non-metallic mineral construction materials and employing 4 800 people.
would incorporate aspects such as product quality, performance and price, would quickly find buyers. This is particularly true for products with high performance/maintenance cost ratios; changing weather conditions and their impact on building processes and structures (e.g. moisture, rain, frost, snow, heat), and the fact that the economy is still very much price-driven.

The main advantages of the Latvian construction sector include excellent logistic infrastructure, a competitive labour skill/cost ratio, good foreign language abilities, and an educated and well-trained workforce. According to Eurostat research (September 2010), Latvians have the highest foreign language skills in the EU countries.

**EXPORT OF BUILDING MATERIALS**

The main construction-material export groups are ceramic building materials, concrete products, cement and gypsum products, and glass products. Since 2009, Latvia's exports of construction materials have experienced continuous growth, maintained to this day.

The largest export markets for construction materials are Germany (19 %) and neighbouring countries Lithuania (12 %), Sweden (12 %), Russia (11 %) and Estonia (9 %).

**BUSINESS OPPORTUNITIES**

Large-scale public infrastructure projects are awarded to companies through public tenders. The opportunities for foreign companies are mainly in specialized construction, as the main contractor or as a subcontractor. There is huge demand for more advanced building materials. Currently most building equipment and housing installations (e.g. tiles, flooring, plumbing) are imported. There is still a high demand for new accommodation in Latvia. The great majority of buildings and houses are in need of renovation and repair, as they were built decades ago and suffered inadequate maintenance.

The Soviet era left Latvia with many old buildings in need of renovation and better insulation. When you consider the cold winters, it comes as no surprise that demand for good insulation is also rising. Renovation is particularly in demand in Riga, especially for old buildings to be renovated to Western standards.

Investment in new technologies, especially in the manufacturing of new, innovative products which

Business profile: Manufacturing of authentic Scandinavian log houses. Modern technologies that maintain the best traditions and match the aesthetic appeal of handcrafted cabins, precipitate a significant increase of trust in the quality of log houses. We supply high-quality pine and larch frames for log buildings, competitive prices and short delivery times. We use a specialised CAD programme to create precise 3D technical models of log buildings from your drawings or sketches, so facilitating the coordination process. The actual work is done by high-productivity, automatic-control CNC machine lines and all the log components completed for transportation. Frame assembly is carried out by one of our cooperation partners.

Seeking cooperation in: We welcome large and small companies for cooperation.

Export volume 2012: EUR 9 900 000
Main markets: Germany, Netherlands,
Belgium, Italy, Turkey, USA
Business profile: A magnetron-sputtered,
anti-reflective coating virtually eliminates
all reflections of visible light, making
Artglass™ appear invisible and providing an
unobstructed view. Designed especially for
the architectural industry, it incorporates
several significant features: Reflection-free,
neutral reflected colour, several levels of UV
protection – 70 %, 92 % and up to 100 %,
the highest possible coating durability,
suitable for outdoor applications, easy to
clean.
Various applications where window
reflections are undesirable and the clarity of
displayed goods/objects is important (e.g.,
display cabinets in museums/shops, shop
fronts, control towers in airports/harbours,
sport stadiums, panoramic restaurants,
car showrooms, zoos and aquariums,
glass atriums, petrol stations, TV/audio
production studios, etc.).
Seeking cooperation in: Specialty glass
wholesalers for architectural, technical glass;
glass processors (glass door and window
makers, etc.); glass construction companies.

Chairman of the Board:
Mr Giacomo Oggero
Contact: Ms Julia Shorbazhyan
Position of the contact person:
Commercial Secretary/Marketing
Languages: Latvian, English, Russian, Italian, French
Number of employees: 10
Founded in: 2001
Turnover in 2013: EUR 396 000
Turnover in 2012: EUR 370 000
Export volume 2013: EUR 396 000
Export volume 2012: EUR 370 000
Main markets: Switzerland, Italy, France, Norway

Business profile: Manufacturing and assembly of wood prefabricated houses, wood prefabricated wall elements and roof trusses. LA FOCA’s manufacturing capacity is 3 000 m² a month. LA FOCA houses are low-cost, eco-friendly, sustainable and energy-efficient, earthquake-proof, and have high-thermo/acoustic insulation. They don’t require on-site storage and are assembled rapidly. Applicable to aesthetic-functional solutions such as ‘green’ roofs, traditional materials and the best modern systems for photovoltaic, solar thermal energy, geothermal power, rainwater container, water purification and home automation. We normally work on individual projects, but a range of standard models is also available. Residential construction (single- and multi-family houses with one or more floors), public buildings (health, sports, and leisure facilities, hotels, restaurants, schools, offices, etc.).
Seeking cooperation in: We are interested in finding and establishing new partnerships. Looking for main contractors, investors, major construction companies in Europe: Sweden, Denmark, Belgium, the United Kingdom, Latvia and others; to sell our products or act as sub-contractors.
Certificates in use: FSC
Member of association: Latvian Builders Association

Business profile: TENACHEM is one of the two companies founded in 2007 by TENAX. TENACHEM produces industrial chemicals – insulating glass and construction sealants, various glues and sealants. TENACHEM is rated one of the world’s top five companies in the manufacturing of insulating glass unit sealants and is the biggest manufacturer of industrial sealants in the Baltic States. For more than 20 years, materials such as OKSIPLASTS and TENAPLASTS, used for sealing deformation joints in residential buildings and one-component glues 88-M and EP-1K or two-component glue VILATS, produced by TENACHEM have been well known in the Baltic States. Two-component sealants for manufacturing insulating glass units – TENAGLASS-2, TENAGLASS-PU and TENAGLASS-3 – are in high demand not only in European countries, but also in Middle East and Far East countries, from South Korea to Brazil and Canada.
Seeking cooperation in: We are open to new ideas and cooperation opportunities in our existing markets and new regions. We are interested in new products and technical solutions. We look forward to establishing new, and supporting existing, effective and fruitful cooperation with our partners, customers and suppliers. Areas of interest in cooperation are any international market in building, engineering works and equipment, the automotive industry, manufacturing, shipbuilding, railway vehicles. Interested in cooperation with regional construction companies and establishing/expanding regional product distribution.
Certificates in use: ISO 9001, ISO 14001, OHSAS 18001

Turnover in 2013: EUR 10 700 000
Export volume 2013: EUR 4 100 000
Export volume 2012: EUR 4 300 000
Main markets: Latvia, Lithuania,
Estonia, Finland, Sweden, Denmark,
Norway, CIS

Business profile: TENAPORS is one of the
two companies founded in 2007 by TENAX.
TENAPORS is the leading manufacturer of
depolymerized expanded polystyrene insulation material,
sandwich panels, and systems of stay-in-
place forms (EPS permanent shuttering kits) in the Baltics and Northern Europe,
carrying such trademarks as TENAPORS,
DOBELES PANELS and SANDWICH PANELS.
TENAPORS ensures a successful market mix
to its customers – combining high-quality
innovative and competitive solutions for
the construction and insulation industries,
resulting in exceptional stability in terms of
corporate growth.
Seeking cooperation in: The main areas
of interest are in the supply of high-
quality, energy-efficient construction
products in Nordic markets, including
insulation materials, sandwich panels, and
wall-insulating systems; strengthening
cooperation with regional construction
companies; and establishing/expanding
regional product distribution.
Certificates in use: ISO 9001, ISO 14001,
OHSAS 18001, EN14509 (Sandwich
panels), CE marking EPS products
according EN13163

Member of the Board:
Mr Ivars Reinhards
Contact: Mr Ivars Reinhards
Position of the contact person:
Chief Executive Officer
Languages spoken: Latvian, English, Russian
Number of employees: 50
Founded in: 2005
Turnover in 2013: EUR 6 400 000
Turnover in 2012: EUR 1 800 000
Export volume 2013: EUR 3 600 000
Export volume 2012: EUR 1 300 000
Main markets: Sweden, Norway, Denmark, United Kingdom
Business profile: WWL HOUSES is a full-service producer of timber-frame houses, modular houses and wood windows. The company runs a factory whose woodworking traditions date back to 1890. The factory is located 40 km from Latvia’s capital, Riga. WWL HOUSES is one of the fastest growing companies in Latvia, having doubled turnover every year for the last five years. Company has been also included in the list of GAZELE rewarded most successful companies. Today, WWL HOUSES has become a well-recognized and appreciated timber-frame house provider among customers in Norway, Sweden, France, Denmark and the United Kingdom. The overall principle of the business is to meet customers’ growing demand for high quality production by producing at the lowest possible cost. The main reason why our company have achieved such great results in timber-frame houses and wooden windows production and export is the fact, that producing costs, transportation and labour force expenses are much cheaper in Latvia than in our export market countries, that has ensured us that we have the best offer for the best price. This strategy has provided our company with wide range of clients and high demand.

The key factors and qualities cooperation with WWL HOUSES provide include:
• High quality: from design to turn-key
• Individual approach, customized projects
• Educated and professional specialists
• 8-years’ experience in European markets
• Considerable experience and knowhow in the management of our timber-frame factory
• One of the leading manufacturers in Latvia
• Lower production costs
• Well-organized full production and delivery cycle
• Full production-cycle management
• Optimized tax policy (tax rates in Latvia are half those in Sweden, Norway and Denmark)

Seeking cooperation in: See Business profile.

Main markets: Latvia, Lithuania, Estonia
Business profile: The A.C.B. GROUP has been in a leading position in infrastructure development in Latvia and the Baltic States for several decades. A harmonized team, long-standing traditions and a sound technological base enable us to maintain and strengthen our position in the market, find innovative solutions and penetrate new markets and sectors.
Construction of roads and bridges, manufacturing of industrial concrete and asphalt are just a few of the group’s diverse operations.
We are proud to have:
• More than 800 seasonal and permanent staff
• About 400 specialised machinery units, including lorries
• Eight quarries for sand and dolomite production
• Seven modern plants, including five bituminous-concrete plants, one industrial-concrete production plant, and a plant producing blocks, cobble stones and other concrete products
• Seven regional representative offices around Latvia, including near the borders with Estonia, Lithuania and Russia
Seeking cooperation in: We offer cooperation in such areas as project management, construction/reconstruction of roads, bridges, optical networks, general infrastructure, airport and railway infrastructure, civil construction. Other cooperation areas include equipment rental, cargo transport, bitumen terminal services, production of bituminous concrete, industrial concrete and related concrete products.

**Turnover in 2012:** EUR 1 200 000  
**Main markets:** Latvia  
**Business profile:** AQUA-BRAMBIS is one of Latvia's most experienced water and wastewater engineering companies. Since 1991, the company has carried out local and international projects of varying scale and level of complexity in the field of water supply and sewerage. Our activities involve the whole cycle of consulting and design of water supply and sewerage systems. Our services: consulting, feasibility studies, system development planning, preparation of tender documents for design, outline design of projects, detailed design of projects, environmental impact assessment studies, preparation of documents for construction tenders, design supervision, supervision of construction, tender evaluation, expertise, project management. The design process involves extensive use of sophisticated software for hydraulic modelling, pump capacity calculations, etc. All data, including drawings and images are stored and processed digitally. Modern computer technologies are put to work to refine the quality of the final output and to make international collaboration easy. In 2003, AQUA-BRAMBIS was one of the founders of the Latvian Association of Consulting Engineers (LīKA) which is a member of the International Federation of Consulting Engineers (FIDIC).  
**Seeking cooperation in:** Collaboration in water supply and sewerage projects. Consulting, design, expertise, project management and supervision.

CITRUS SOLUTIONS

Chairman of the Board:
Mr Miks Stūrītis
Contact: Ms Agnese Lemša
Position of the contact person: Marketing Project Manager
Languages spoken: Latvian, English, Russian
Number of employees: 278
Founded in: 2005
Turnover in 2013: EUR 22 300 000
Turnover in 2012: EUR 21 600 000
Main markets: Latvia
Business profile: CITRUS SOLUTIONS is a Lattelecom Group company, the shareholders of which are the Republic of Latvia (51 %) and TeliaSonera (49 %). The company was established in 2005 through separating the Network Maintenance Division as a spinoff from Lattelecom. CITRUS SOLUTIONS provides services in areas such as data centres, energy efficiency, facilities of strategic importance, building engineering systems, road and street communication networks, external communication networks, ventilation and cooling, as well as the maintenance of telecom operators' networks. CITRUS SOLUTIONS has the capabilities to provide a full range of services in all of a customer's operations, ensuring support throughout the project cycle. CITRUS SOLUTIONS tailors solution ideas to best fit customers' needs, defines design tasks, designs, constructs and maintains its solutions, thus helping avoid any problems that may arise when coordinating the work and limited liability of different suppliers. CITRUS SOLUTIONS assumes full overall responsibility for the infrastructure as a whole – from the idea through to its commissioning and operation.

Member of association: Latvian Builders Association, Latvian Wood Construction Cluster
The mission of the Investment and Development Agency of Latvia (LIAA) is to promote growth of the economy of Latvia. Accordingly, the objective of LIAA is to promote business development by facilitating increased foreign investment, while elevating the competitiveness of Latvian entrepreneurs in both domestic and foreign markets.

With over 20 years of experience in attracting foreign direct investment to Latvia and promoting foreign trade, the Agency has worked continually to improve the business environment and provide services appropriate to the needs of business.

Following Latvia’s accession to the EU in 2004, the Agency needed to adopt new methods and tools, including the effective utilisation of resources from EU Structural funds. Today, LIAA offers an integrated solution – it supports companies in Latvia trading internationally as well as overseas businesses seeking partners or locations in Latvia and administers state support programmes for entrepreneurs co-financed from EU Structural funds.

To ensure high quality communications with customers the Agency has representative offices in Minsk (Belarus), Beijing (China), Copenhagen (Denmark), Paris (France), Berlin (Germany), Tokyo (Japan), Vilnius (Lithuania), The Hague (the Netherlands), Oslo (Norway), Warsaw (Poland), Moscow (Russia), Stockholm (Sweden), London (UK) and Kiev (Ukraine).

An ability to anticipate the rapidly changing needs of businesses and markets by offering new services characterises the Agency’s own competitiveness, built on the knowledge and competencies of our experienced specialists. LIAA pays close attention to the quality of its own performance, comparing it with world best practices, and subsequently introducing new services and solutions for our customers.

We look forward to helping your company succeed in Latvia!

The Latvian Export Import Directory
- The online database that will jumpstart your business in Latvia.

With online company promotion, search features and details freely available, EXIM helps companies to connect.

With EXIM you can:
- Promote your products or find new ones on Latvia’s B2B trade website;
- Create an online business proposal and advertise your products;
- Find new business partners and find out about actual events in Latvia;
- Access all the business news from Latvia.

The main sections of the portal:
- Companies – a database of Latvian companies;
- Proposals – business advertisements and commercial ideas;
- Events – a list of events in Latvia and abroad;
- Market Info – information about the Latvian economy, industry and commerce.

We make it easy for international businesses to find the right contacts in Latvia!
