Tab Systems Inc. specializes in the development and production of multi-modal biometric systems for identification, access control, time & attendance and building automation. We develop and manufacture smarti® – a complete access control and time & attendance solution based on multimodal biometrics using face and voice recognition. Multiple functions, high reliability, adaptability and unlimited connectivity mean it can be used in business/corporate environments, high security environments, building automation... An additional advantage of this great product is the integration of multiple additional features (video intercom, video & IP phone, video messaging, video surveillance...) into one compact device for a reasonable price. smarti® is also completely protocol independent and can therefore be used to control almost any kind of I/O device (electronic locks, lights, alarm systems, finger print scanners, magnetic card readers...). Designed with flexibility in mind, smarti® can be used for many applications within: business/corporate and high security environments, for home/building automation etc.
