- Seek partners for projects and business ventures
- Find the technologies that will address your most pressing problems
- Raise your public profile and build on your brand image
- Meet colleagues, solution providers, potential customers, and other decision-makers - on a global level
- Advance your career through networking and education
- Leverage your time in a single cost- and time-effective forum for professionals in the industry
- Learn about solutions to water, energy and environmental challenges

Israel-Latvia Chamber of Commerce and Industry to be established in Israel this November.

(LETA - Latvian news agency)

It was informed by Latvian Minister of Economy Artis Kampars after meeting with Israel's Minister of Industry, Trade and Labor Shalom Simhon in Riga this September.

Kampars pointed out that entrepreneurs initiated the foundation of the Chamber. He expressed hope that it could be established this November and thus strengthen the economic ties between both countries.

The Chamber would be helpful to Israeli entrepreneurs to acquire information about Latvia

October 24, 2011: The Israeli Economy: Fundamentals, Characteristics and Historical Overview.
(Published by the Ministry of Finance)

The Ministry of Finance recently published an [English booklet](#), describing the fundamental characteristics of the Israeli economy, and giving an historic perspective on major developments throughout the years.

The booklet is designed for economists and non-economists alike. It opens with a very broad description of the Israeli economy today: an advanced, resilient, innovation-driven and knowledge-based economy, which developed over the years into an R&D and high-tech powerhouse.

The overview goes briefly through the historic development of the Israeli economy, surveying its growth, its population and society, its industry and trade, its public sector, inflation and currency.

The overview also focuses on data-based graphs rather than text, as numbers and figures complete the story in the briefest and clearest way.

Table of Contents

Israel Today

- *Israel in the World Today*
- *Advanced Economy*
- *Resilient Economy*
- *Cultural Advantages*
- *Innovative Economy: The Start-Up Nation*
- *High-Tech Economy: The Silicon Wadi*
- *From Socialism to an Open Market*

Historic Economic Growth

- *GDP Growth*
- *GDP per Capita Growth*
- *Population Growth and Immigration: Aliyah*
- *Capital per Employee*
- *Human Capital Growth: Education*

Society and Employment

- *Society*
- *Participation Rate and Employment*
- *Worker Unions: the 'Histadrut'*

Industry and Trade

- *From Oranges to Software*
- *Israel's Main Trading Partners*

Government Expenditures

- *Government Expenditures as a % of GDP*
- *Security Expenditures*
- *Historic Budget Deficit*
- *Budget Deficit since 1985*
- *Historic Public Debt*
- *Public Debt in Recent Years*

Inflation

- *Historic Inflation*
- *Israel's Inflation Crisis and the Stabilization Plan*
- *Inflation in Recent Years*

Currency

- *From Israeli Lira to New Israeli Shekel*
- *New Israeli Shekel Exchange Rates*

New Israeli VC seeks portfolio companies in smart agrotech.
(MFA/ By Rivka Borochoy)

Pict. AquAgro Managing Partner Hillel Milo

"We see the fundamental needs in the world, which are really water, energy and food," says the fund's manager.

When we think of green technologies, fancy solar panels and cars that go vroom on space-age hydrogen batteries may come to mind. Or how about a machine that sucks up greenhouse gases so the whole global warming problem will be solved overnight?

But before the next big thing that might never actually be invented, making existing earth-bound practices like farming more efficient is among the core solutions that our energy-intensive planet needs. This is the focus of a new Israeli-founded clean-tech fund called AquAgro II.

The recently announced fund is seeking early-stage investors - those people and companies who see their future fortunes tied with the success of green technologies, and those in particular with the vision and practical nature of Israeli clean-tech entrepreneurs.

AquAgro II aims for a portfolio of about 10 to 12 companies. It will be based on the model of the first fund, [AquAgro](#), which invested \$50 million in Israeli clean technologies starting three and a half years ago in Tel Aviv.

Moving remedies from lab to pharmacy.
(MFA/ By Avigayil Kadesh)

Pict.: BioLineRx CFO-COO Phil Serlin

Incubator takes promising new Israeli drug technologies through the first clinical testing stages and sends them on their way for finishing touches.

Potential drugs for pain, schizophrenia, inflammatory bowel disease and 11 other common conditions are all in the pipeline of the Jerusalem-based [BioLineRx](#), which operates the only government-approved biotechnology incubator in Israel.

With up to 80% funding from the [Office of the Chief Scientist](#), the company fills an unusual "middleman" role between the discovery of a new treatment molecule and its final development by a pharmaceutical company.

"Very few players can take a drug from the initial research stages to the end, so the industry is highly segmented," explains chief financial and operating officer Phil Serlin. "We take promising molecules into our portfolio, and we bring forward only those that prove themselves to have therapeutic potential and will interest international pharma. Few companies in the world have this model."

Founded in 2003 by Israeli generic drug giant Teva Pharmaceuticals and several life science venture capital funds to turn more of Israel's basic research into products, BioLineRx has so far sent along two molecules to advanced clinical testing.

The first, dubbed BL-1020, could become the world's first antipsychotic drug for schizophrenia that also offers cognition enhancement. "The whole world has been looking for this, because 90 percent of schizophrenia patients suffer cognition impairment to some degree," Serlin explains.

Based on a molecule invented by researchers at Tel Aviv and Bar-Ilan universities, BL-1020 taps into one of the largest markets in the world. "Close to 1% of the world's population suffers from schizophrenia and the US antipsychotic market had estimated sales in excess of \$10 billion in 2010," says Serlin. "We are hopeful this might be a big breakthrough with the potential to be a serious blockbuster."

October 24, 2011: Bank of Israel leaves interest rate for November 2011 unchanged at 3%.
(Communicated by the Bank of Israel)

The decision to leave the interest rate for November unchanged after reducing it for October is in line with monetary policy aimed at stabilizing the rate of inflation within the price stability target range of 1-3% over the coming 12 months, and is intended to support growth while preserving financial stability.

October 7, 2011: Citigroup Financial Products Israel becomes second Citi company to join TASE.
(Communicated by the Ministry of Finance)

CEO of Citibank: "Our relationship with TASE, which began a number of years ago, is helping to create exposure for the Israeli capital market and bring international investors to Israel."

The [Tel Aviv Stock Exchange](#) (TASE) Board of Directors approved Citigroup Financial Products Israel as a new member. This is in addition to Citibank, which has been TASE member since 2006 and serves as one of the largest custodian institutions operating in Israel.

Full text:

Citigroup intends to open a technology research and development center in Israel in December to support its global activities. (by "Invest in Israel")

Citi has many development centers which support the bank's global operations, and it will add the Israeli center to its portfolio as a center of strategic innovation that focuses on the development of advanced products and applications for the capital market," said Don Callahan, Citi's chief operations and technology officer.

As part of a plan launched by the Israeli government in 2010 to attract financial services sector firms to Israel, the government has granted Citi 93 million shekels (\$25 million) over 5 years to help finance the center.

The U.S. bank will become the 2nd international bank to open an R&D center in Israel after Barclays Capital, which opened earlier this year.

October 2011: Israeli Prof. Daniel Shechtman wins 2011 Nobel Prize in Chemistry.
(“Invest in Israel”/ Israel MFA)

Professor Daniel Shechtman of the Technion-Israel Institute of Technology has been designated the winner of the Nobel Prize in Chemistry for 2011 for his discovery of quasicrystals - a new form of matter that has become a major subject field for physicists, materials scientists, mathematicians, and crystallographers.

INNOVATION

Israeli researchers identify key to insulin production
(by “Invest in Israel”- investment promotion center/ Israel21c)

*Leader of the multi-year study, Prof. Yuval Dor of Hebrew University of Jerusalem
(Pict.: Israel21c)*

A multi-year project led by Prof. Yuval Dor of the Hebrew University's Institute for Medical Research has identified a glucose-sensing enzyme in the cells, glucokinase, as the key molecule that triggers beta cell regeneration in diabetic mice.

Since the study showed that regeneration depends on glucokinase levels, the finding may pave the way for developing a new kind of drug to modulate glucokinase or other steps in the glucose-sensing pathway to direct beta cells toward regeneration and replication, and offers hope for people with Type 1 ("juvenile") diabetes.

Intel buys Israeli mobile navigation firm Telmap.
(by “Invest in Israel”- investment promotion center)

Chipmaker Intel Corp has agreed to acquire mobile navigation software maker Telmap.

Telmap, which provides mapping, local business listings and other location-based services, has been profitable since last year, with sales for 2010 reaching \$28 million, and an expected turnover of \$33 million for 2011. Telmap powers mapping applications for a number of mobile operators, including Orange, Telefonica's O2 and SFR in France.

Herzliya-based Telmap has 210 employees.

Intel, the world's No. 1 chipmaker, has two plants and four development centers in Israel

Biotech giant Monsanto buys Israel's beeologics.
(by "Invest in Israel"- investment promotion center)

The Monsanto Company, a US-based multinational agricultural biotechnology corporation, has acquired Beeologics Ltd., a developer of targeted biological pest and disease control solutions for bees and bee colonies. Monsanto stated it would support Beeologics' team and products pipeline and intends to apply Beeologics' expertise in biological products for more general use in agriculture, by using the company's core technology for its discovery and development pipeline. One of Beeologics' current projects includes a product that uses a naturally-occurring process to help protect bee health.

Monsanto is the leading producer of genetically engineered (GE) seed and provides the technology in 90% of the genetically engineered seeds used in the US market. The company is headquartered in Creve Coeur, Missouri.

Israel's Foreign Trade & Foreign Trade by Countries – September 2011

(from Press Releases of 11/10/2011 and 26/10/2011 by the Central Bureau of Statistics of the State of Israel)

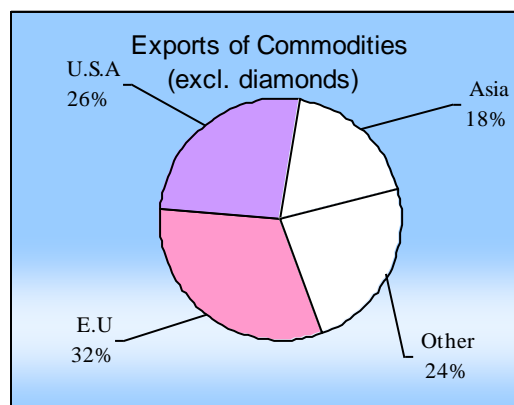

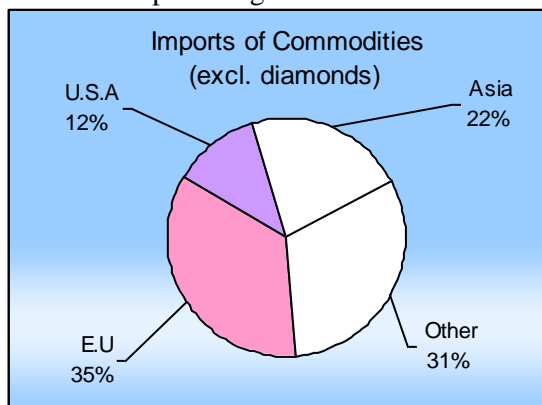

In September 2011, imports of goods totaled NIS 20.5 billion, exports of goods totaled NIS 16.2 billion and the trade deficit totaled NIS 4.3 billion.

Trend data on foreign trade in July-September 2011

- exports of high technology industries decrease, while exports of medium low technology industries increase
- a decrease of 27.9% at an annual rate in exports of pharmaceutical products
- imports continue to increase

Trend data on foreign trade by countries in July-September 2011:

- point to a drop in exports to USA
- point to a slowdown in imports of goods from EU countries.
- point to a rise in exports of goods with Asian countries

The above is based on temporary data regarding goods that cleared Customs, not including trade between Israel and the Palestinian Authority.

The data do not include import and export of services that include, among others, software.

October 2011

25.10.2011	Hollamama	<p style="text-align: center;">Hollamama</p> <p>Hollamama brand was born together with Yael's first daughter. During her pregnancy she found herself designing new style diaper bags. In her designs she uses fabrics that she relates to regardless of her pregnancy or being a mom. As a designer and a mom, Yael believes that style and functionality must go hand-in-hand. Her bags are easy to carry on the shoulder, or on a stroller. The internal division provides all the standard needs and more. The stroller charm was created from her wish to spiritually protect her daughter. Hollamama's hamsa are soft and pleasant amulets which represent the connection between a mother and her child while preserving femininity. Each of the four Hamsa-women holds characteristics of feminine strengths that are borrowed from its cultural uniqueness. The Hamsas are full of style and meaning, they were born with the wish to bring good energies to people. Yael created few options to this meaningful jewelry, as a necklace, bracelet, and earrings or as a charm to hang on a bag or a stroller.</p>	<p style="text-align: center;">Contact Info</p> <p>Contact person: Yael Oz Carmon</p> <p>www.hollamama.com  contact@isralexporter.com  +972-54-6429626</p>

18.10.2011	<p>AquaSpark</p> <p>Numerous industries are highly dependent on processes that produce wastewater with varying levels of contamination. In recent years, there has been growing public criticism of the extremely negative health-related and environmental impact of the discharge of industrial wastewater into communal sewage systems. This has resulted in increasingly stringent regulation worldwide, which has in turn brought about significant growth in the industrial water and wastewater treatment sectors. Traditional solutions for industrial wastewater treatment have invariably proven either too expensive or simply inefficient at treating certain types of contaminants, especially those prohibited from entering municipal water treatment plants. It is this landscape that serves as the ideal opportunity for the economic and highly efficient wastewater treatment solution AquaSpark has developed. AquaSpark is now looking to raise \$3 to 5 million from additional investors to support its international business expansion. The Vision is to supply solutions to those markets from problem definition till TKP, cooperating with outsourcing identified suppliers. Use of Funds: AquaSpark intends to develop a sales and marketing organization and focus on the expansion of commercial beta sites and a strategic partner/integrator framework.</p>	
	<p align="center">AquaSpark</p> <p>AquaSpark is an Israeli start-up company, providing comprehensive cost-efficient wastewater treatment solutions for industrial, agricultural and municipal applications. AquaSpark solutions combine its innovative Boiling Layer Treatment Technology (BLTT) for treatment of wastewater with high contents of organic contaminants with other state-of-the-art wastewater treatment technologies. AquaSpark, which was founded by specialists in wastewater treatment advanced technologies, has the expertise and the engineering facilities required for in-depth analyses of customer's needs resulting in optimal, field-proven and cost efficient solutions. AquaSpark's solutions are cost-efficient for large as well as for small volumes of treated wastewater. They are particularly well suited for industrial and agricultural plants, with wastewater of high contents of organic contaminants (high COD, BOD), and for plants with small volumes of wastewater that treat their wastewater in remote locations.</p>	<p align="center">Contact Info</p> <p>Contact person: Pesah Maor www.aquaspark.co.il  contact@isralexporter.com  972-4-6850292</p>
18.10.2011	<p>Ruth Doron Designs</p> <p>We are looking to connect with store owners, wholesalers, chain stores, of Jewelry stores, Gift Stores, and Christian Stores, in the USA, Europe, Australia and wholesalers in South America and South Korea.</p>	
	<p align="center">Ruth Doron Designs</p> <p>Ruth Doron Designs (RDD) specializes in silver jewelry. Ruth Doron, the founder and the chief designer, graduated from the Shenkar School of Designs in Ramat-Gan. The company designs and creates handcrafted fashionable jewelry, which is made of sterling silver, combined with pearls, semi precious stones, sawrovski, and goldfilled. The delicate style of RDD jewelry is suitable for women of all walks of life. The firm is located not far from Nazareth, and Mt. Tabor. Dr. Hagai Doron, the manager of RDD, is also a Bible scholar, and author of the book "Bible and Democracy". RDD also produces unique collections of Christian jewelry, inspired by the Bible and by the sites of the Holy Land RDD sells to Jewelry stores, Gift Stores, and Christian Stores in the USA, Canada and Romania.</p>	<p align="center">Contact Info</p> <p>Contact person: Ruth Doron www.ruthdorondesigns.com  contact@isralexporter.com  972-4-6531090</p>

The materials that are been used in BulletPlate are steel of different types, aluminum, ceramics, Kevlar, polyethylene, glues and plastic materials.</p>	<p style="text-align: center;">Contact Info</p> <p>Contact person: Moti www.bulletplate.org contact@isralexporter.com 972-8-8508658</p>
18.10.2011	<p>Gad Dairy</p> <p>Gad dairy-Our export division is growing year after year as we continue to spread quality product and authenticity around the globe. Currently we are very active in the US and European markets and looking to expand to new markets. Buyers, Brokers, Distributors: please accept our personal invitation to discuss how we can introduce you to our unique products and services. In an effort to continue to grow, we are seeking new markets around the globe by taking advantage of the knowledge, experience and unique line of products. Gad Dairy is also considering establishing production capacities in the US, preferably by joint venture with a local manufacturer or distributor or by acquiring an existing business and converting it to Gad Dairy's standards and needs.</p>	
	<p style="text-align: center;">Gad Dairy</p> <p>Gad Dairy was established in 1980 by Ezra Cohen, owner and chairman of the board. It is the fourth largest dairy manufacturer in Israel, specializing in premium dairy products, such as Italian and Mediterranean cheese as well as hard and soft cheese. Gad Dairy is privately owned with a unique character reflecting family tradition values that have been passed on from generation to generation. Gad Dairy has state of the art production and distribution facilities in Tel Aviv, Israel. In addition, Gad Dairy has a partnership with seven other dairy farms, developing and manufacturing unique and innovative products for the local and global markets under the Gad Dairy brand name and others. Using top of the line technology in production lines combined with family tradition methods, Gad Dairy has become the #1 brand in Israel for premium cheese products such as Ricotta, Mozzarella, Feta, Sheep and Goat cheese, Syrian Cheese (Hallumi) and more, all under the supervision of the local kosher agencies. Gad Dairy is also a leading manufacturer for the food service industry servicing more than 70% of the food industry market and providing first class service and product customization according to customer needs. Starting out as a small dairy farm in Turkey four generations ago, Gad Dairy has developed into a leading manufacturer and distributor, specializing in all premium cheese, increasing its market share by double digits in the last five years. With over 200 employees and 60 exclusive area managers, Gad Dairy provides superb customer service to every point of sale. Gad Dairy has its own distribution capacity, reaching over 3,500 points of sale across the country, including retail grocery chains and privately owned hotels, restaurants, cafés and pizzerias.</p>	<p style="text-align: center;">Contact Info</p> <p>Contact person: Tzvika Dor www.gad-dairy.com/en/ contact@isralexporter.com 972-3-5517961</p>
18.10.2011	<p>Neviot</p> <p>Neviot, a leading mineral water manufacturer, is looking to connect with: *Retail buyers in large food chains *Food and beverage buyers in pharma chains *Importers/distributors who hold strong contacts with buyers at retail chains Target markets: North America, West and East European countries, Australia and East Asia</p>	

	<p style="text-align: center;">Neviot</p> <p>ounded in 1989, Neviot is a leading manufacturer and distributor of natural mineral water in Israel. The company's innovative range of products includes both bottled water products and water cooler dispensers for private and office use in a wide range of sizes and styles. Since 2000, Neviot is owned by The Central Bottling Company Group (CBC) - Israel's leading manufacturer and distributor of beverages, with an extensive list of business activities both in Israel and across the globe. Combine the best of both worlds! Enjoy the nutritional values of natural mineral water while delighting in the pleasures of a twist of flavor. Introducing NEVIOT+: a lightly flavored water beverage, from Israel's leading natural mineral water company.</p>	<p style="text-align: center;">Contact Info</p> <p>Contact person: Nili Shachar www.neviot.co.il ✉ contact@isralexporter.com ☎ 972-3-977763</p>
<p>18.10.2011</p>	<p>Minefield Shoes Minefields a leading manufacturer of protective equipment for personnel operating in active minefields, is looking for independent sales agents with contacts with the military or government purchasing bodies. Target markets include USA, Brazil, Argentina, Germany, Australia and African countries</p>	
	<p style="text-align: center;">Minefield Shoes</p> <p>Minefield Shoes MFC MFC CHECKMATE SAFETY SHOES (MATRAMINE) NSN: 8430-15-121-9857. NSN: 1385-14-508-8844/5 were developed to help army forces to safely cross minefields night and day. They are the result of several years of lab testing and much more of extensive field testing on all kinds of terrain which may be encountered. It is no surprise therefore that, after more than ten years of extensive use with IDF, the French army and most of NATO forces, not a single accident has been reported to this day. So called competitive products either propose an extremely dangerous proposal of fallacious protection in case of mine explosion (likely to happen with their design) or simply try to go around our design and patent, tampering with important features of the MFC CHECKMATE (MATRAMINE) and proposing fancy accessory features that have yet to be field proven of any interest.</p>	<p style="text-align: center;">Contact Info</p> <p>Contact person: Shlomo Ringler minefield-shoes.com ✉ contact@isralexporter.com ☎ 972-8-6750342</p>

18.10.2011	<p>Artnova Artnova is looking for a business partner to open a branch abroad or to franchise a branch particularly in the U.S. Looking for an agent or a partner in the following sectors; Jewish communities and synagogues, architects and designers, private customers, business and public customers. Looking to collaborate with brand stores and/or design centers.</p>	
	<p>Artnova Artnova Studio & Galleries was established in 1989 and gave birth to the concept of an exclusive studio for artists to design and create Soft Art Paintings in a new technique developed in Israel by local artists. In the soft painting technique the artist uses synthetic acrylic fibers in a wide variety of shades (substituting the familiar oil or water based colors which artists use in a standard painting). For the purpose of rendering the image the artist makes shapes using these fibers, pieces of synthetic felt or burlap and colorful acrylic strings of different thicknesses, thus effectively painting with these materials to create their ideas. The special effects achieved with Soft Paintings are obtained using multidimensional harmony which has brought about a breakthrough in the process of creating original art. Soft Paintings in the Soft Art technique is the world's only studio dedicated to the creation of Soft Paintings which are created exclusively by Artnova's talented artists.</p>	<p>Contact Info Contact person: Roy Mendal Shaked ⤴ http://artnova.co.il ✉ contact@isralexporter.com ☎ +972-2-5335996</p>

The International CIPA Conference 2012 Plasticulture for a Green Planet

Call for Abstracts

Modern agriculture is based on a wide spectrum of plastic products. From irrigation systems through greenhouse technologies, protective nettings, soil covers, plastics for animal husbandry, food packaging, and more. The level of sophistication in both the production and uses of plastics in agriculture is increasing continuously, based on the huge scientific progress made during the last few decades in plastics chemistry, nano- and photovoltaic technologies, as well as plant and animal sciences.

The **International CIPA Conference 2012** in Tel Aviv, Israel, will address the latest achievements, developments, and challenges in plasticulture, from science to industry to field practices, and will focus on the following topics:

- Innovations in Plasticulture – present and future prospects
- Agricultural implementations in both developed and developing countries
- Environmental-ecological aspects of Plasticulture
- Linking industry and research in chemistry and plastic products

To be considered for an oral or poster presentation at the Conference, please submit your abstract by November 30, 2011.
