Health Tourism in Latvia

CATALOGUE

Health Tourism in Latvia

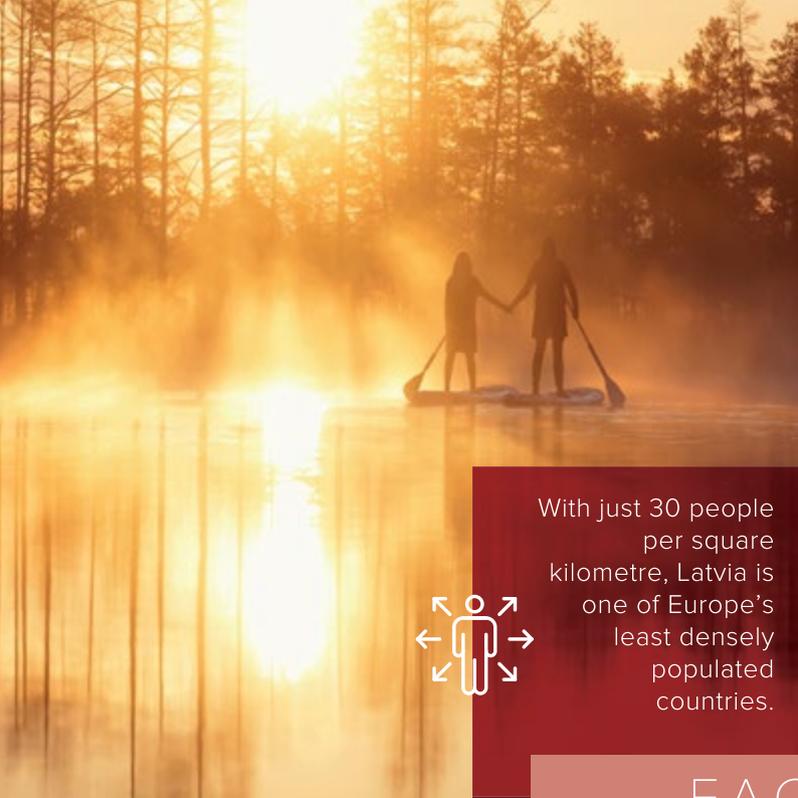

CATALOGUE

The level of quality, professionalism, fast access to services and excellent value for money make Latvia an appealing destination for medical and health tourism. Diagnostics, medical rehabilitation, phlebology, dermatology, plastic surgery and dentistry are among the most popular medical services provided at Latvia's private clinics, rehabilitation centres and hospitals.

Latvian specialists are well-versed in working with international patients and can communicate fluently in several foreign languages. Latvia

boasts a temperate maritime climate and wealth of natural healing resources that provide unique treatment opportunities and a serene setting to encourage recovery.

Latvia is easy to reach by road, sea, air and rail. Riga International Airport offers direct connections to more than 100 destinations. Patients are encouraged to extend their stay to explore Latvia and Riga, the Baltics' capital of culture, a city of stunning architecture and paradise for foodies.

With just 30 people per square kilometre, Latvia is one of Europe's least densely populated countries.

Latvia has a 500 km long coastline with both fine sandy beaches and beautiful rocky stretches.

FACTS

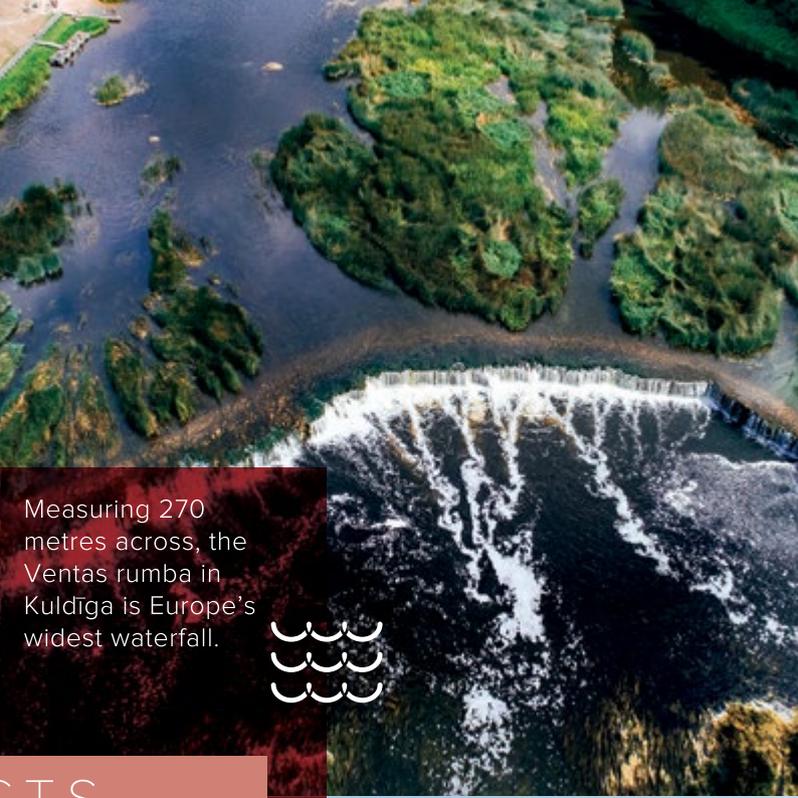

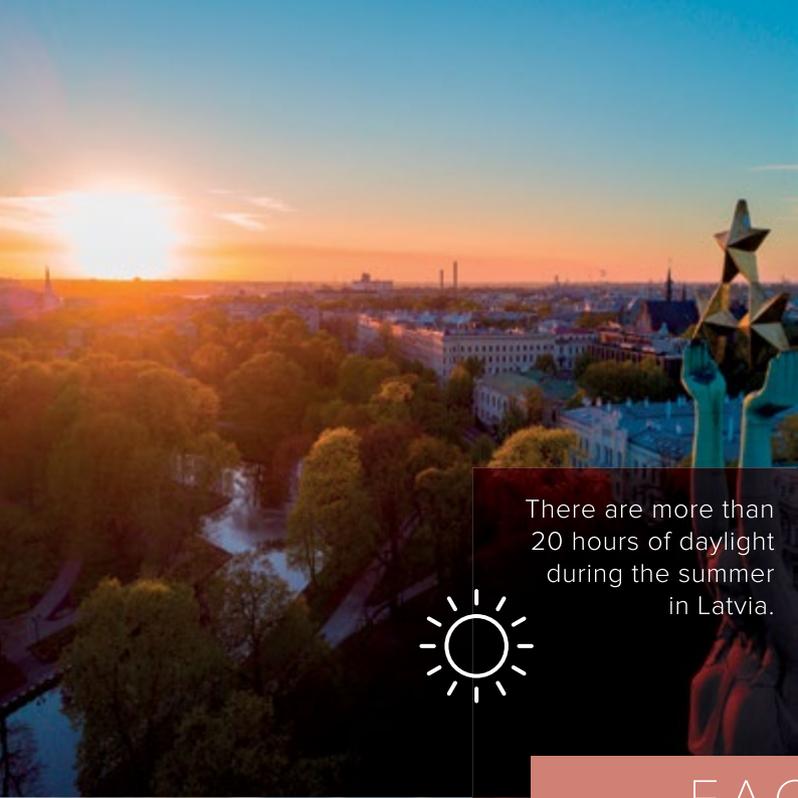

More than half covered with forests, Latvia is one of the world's greenest countries.

Every autumn people from all over Latvia head to Sigulda to see the brightly coloured leaves in Gauja National Park.

MAGNETIC
LATVIA

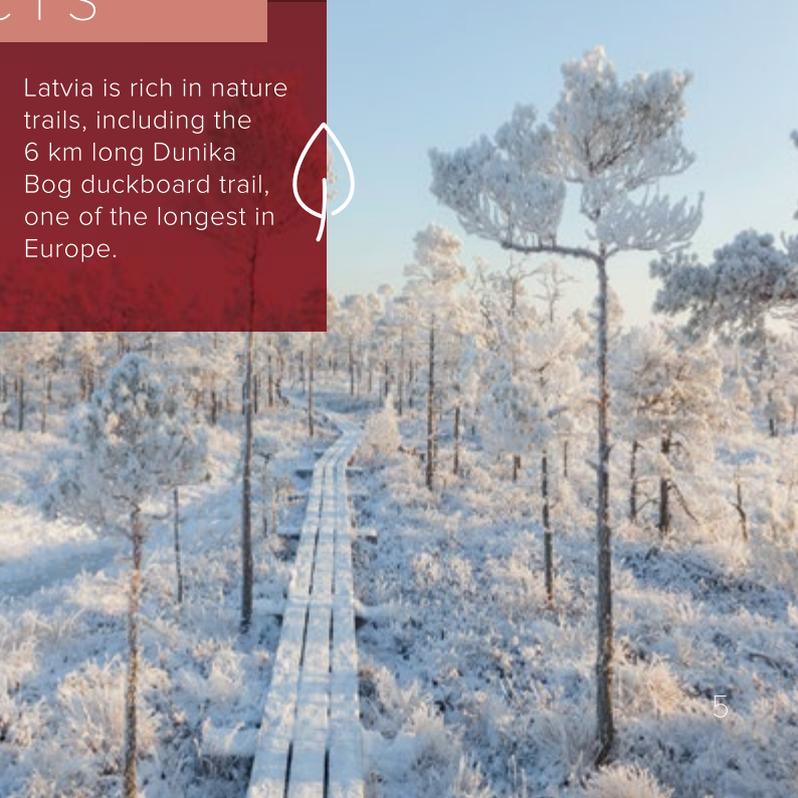

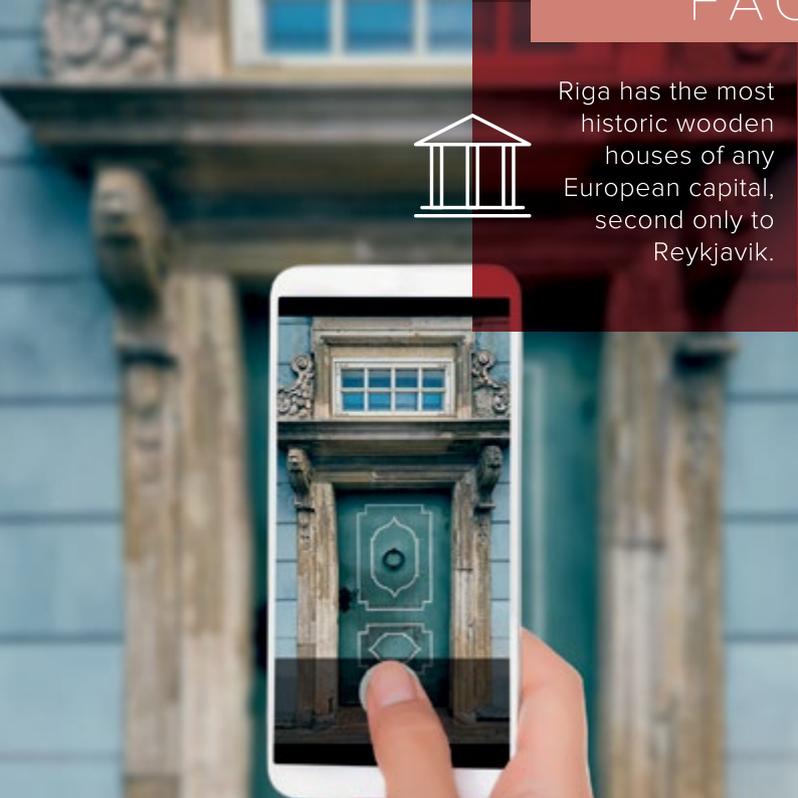

There are more than 20 hours of daylight during the summer in Latvia.

Measuring 270 metres across, the Ventas rumba in Kuldīga is Europe's widest waterfall.

FACTS

Riga has the most historic wooden houses of any European capital, second only to Reykjavik.

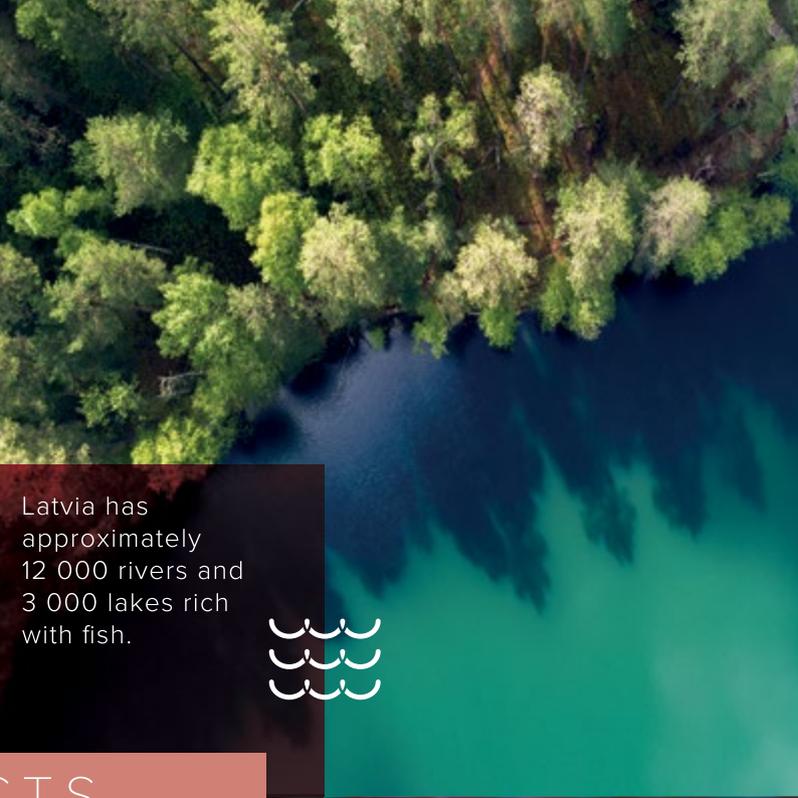

Latvia is rich in nature trails, including the 6 km long Dunika Bog duckboard trail, one of the longest in Europe.

Oak trees have a very special meaning for Latvians. The Oak of the Ancestors in Kaive, western Latvia, is the biggest oak in Latvia with a circumference of 10.4 m.

Latvia has approximately 12 000 rivers and 3 000 lakes rich with fish.

FACTS

Around 10 000 pairs of storks nest in Latvia, and these big birds are traditionally considered sacred.

Latvians don't need organic food shops. Almost every family still forages for berries and mushrooms, gathers teas and collects birch sap juice in the spring.

MAGNETIC
LATVIA

TOP 10 REASONS WHY LATVIA

Latvia's health clinics and hospitals can offer patients quality diagnostic and healthcare services, combining the experience of doctors with the latest technologies and high standards.

QUALITY

The healthcare available in Latvia corresponds to the highest level offered by the world's leading clinics. The clinics use certified apparatus corresponding to international quality standards.

SAVINGS

Latvia's clinics typically offer patients a sensible pricing policy with no hidden charges. Service prices are competitive within the Baltic Sea Region and lower than in Western European and Scandinavian countries, enabling patients to make cost savings of 50-70%.

AVAILABILITY

The date of consultations and operations can usually be arranged within the next two weeks, sometimes earlier. Examinations are available with no waiting lists in accordance with a carefully planned schedule.

PROFESSIONAL KNOWLEDGE

The education of Latvia's specialists corresponds to the highest international standards and the country's top medical practitioners regularly continue their further education, thus mastering the latest healthcare practices.

TECHNOLOGY

Latvia's clinics are continually introducing cutting

edge technologies that are widely acclaimed within the international medical community. Latvia's clinics offer innovative treatment methods, which guarantee the most effective results possible.

SAFETY AND EU QUALITY STANDARDS

The infrastructure, environment and work organisation at Latvia's clinics correspond to Europe's best patient care standards. The country's state-of-the-art healthcare institutions conduct sterilised procedures according to the highest EU quality standards. These clinics have received ISO quality certificates.

PRIVACY

Professional ethics and patient safety are the cornerstones of our professionalism. We guarantee absolute confidentiality, meeting EU requirements in relation to personal data protection.

NO LANGUAGE BARRIERS

Latvia's specialists communicate fluently in several foreign languages including English, Russian, French and German.

CONVENIENT GEOGRAPHIC LOCATION

Reasonably priced transport is available by sea, air and rail. More than 100 destinations are accessible from Riga International Airport.

Added value – Latvia's nature and four seasons. Patients can enjoy Latvia's beauty and visit the capital of culture in the Baltic States, Riga – an architectural pearl and gastronomic paradise.

DIAGNOSTICS AND MULTIFUNCTIONAL HOSPITALS

Check-ups carried out in one location in as little as one to three days! Latvia's clinics offer medical imaging, endoscopies, functional and invasive diagnostics, tests and check-up packages. Some screening programmes consisting of two to four procedures can be completed within just a few hours. Patients receive European quality at affordable rates.

DENTISTRY

Many specialists in one place. Visits to a hygienist, dentist, surgeon, implantologist and prosthetologist can be arranged within a short time of one another. All patients receive an individual treatment plan.

Latvia's clinics keep track of the very latest innovations in global dental technology and apply them to their work. The highly qualified specialists have interned at German, Swiss and American clinics and regularly participate in international congresses, conferences and seminars to enhance their knowledge.

Dental services, tooth implants and prosthetics are competitively priced. The clinics are renowned for their transparent pricing policies.

IVF AND FERTILITY

Latvia's clinics have a success rate of well over 50%. In patients up to 30 years of age, fertilisation is successful in over 70% of cases, which is one of the best results in Europe.

The moment a baby joins a family is one of the most beautiful moments in life. Latvia's specialists are here to help that happen, offering full service from consultations to treatment and delivery assistance.

Patients have access to specialists in gynaecology, urology and oncology to identify and address the root cause of infertility.

Latvia is home to the only reproductive genetics laboratory in Northern Europe where tests can be conducted at the embryonic stage, allowing to identify genetic illnesses.

ONCOLOGY

Latvia has over 70 years of experience in the research and treatment of oncological diseases, which ensures specialists are very thoroughly trained. Thanks to their level of expertise, access to modern equipment and methods, Latvian oncology specialists are some of the best in Europe.

OPHTHALMOLOGY

The state-of-the-art equipment in Latvia's clinics and experienced staff comply with European and American quality standards. Latvia's ophthalmologists are dedicated to constant growth and lifelong learning. They regularly attend international training and experience exchange programmes in the USA, the UK, Austria, India, Germany, Denmark, Sweden and other countries to be able to apply the most progressive treatments.

They also practice in academics, teaching the next generation of specialists and mentor experience exchange programme participants.

RECONSTRUCTIVE AND PLASTIC SURGERY

Latvia's leading plastic surgeons are internationally acclaimed and their reconstructive work has been showcased at global congresses. The field of microsurgery has been developing significantly since 1985.

Latvia's surgeons have studied and interned at the best Western medical universities and clinics. They give lectures abroad and belong to leading industry associations including the International Confederation for Plastic Reconstructive and Aesthetic Surgery (IPRAS), the American Society for Aesthetic Plastic Surgery (ASAPS) and European Society for Laser Aesthetic Surgery (ESLAS).

Clinics comply with the European Union's personal data protection requirements to guarantee patient confidentiality.

PHLEBOLOGY AND PROCTOLOGY

Doctors use accurate duplex ultrasound technology to examine blood vessels. Clinics are equipped with state-of-the-art equipment for performing computed tomographic venography (CVT) to assess the extent of deep vein thrombosis. While other methods may only provide insight into certain segments of deep veins, CVT provides a complete overview.

Varicose veins are one of the most common conditions, affecting 26% of women and 24% of men. Nowadays, almost every second person aged between 30 and 70, living in comfortable conditions around the world has some form of venous disease.

PAEDIATRICS

Paediatricians pay deep attention to developmental or congenital defects in infants and toddlers, and work with children and adolescents up to the age of 18. Doctors may look closely at hereditary diseases such as sickle-cell anemia and cystic fibrosis. Trained staff can advise on infectious diseases and immunisation. They have access to contemporary equipment and technology to perform laparoscopies, thorascopies, arthroscopies, microsurgery and other procedures, which can reduce the risk

of complications and shorten the recovery and rehabilitation period.

DERMATOLOGY

The modern equipment at Latvia's clinics helps resolve numerous skin conditions and apply unique skin rejuvenation treatments. Today's less invasive methods ensure quick delivery, a short recovery period and reduce complications.

Dermatologists can help treat acute and chronic skin diseases, skin growths, fungal skin and nail infections, acne and dermatitis, septic and viral skin conditions such as furunculosis and herpes, scabies, pediculosis, demodicosis, skin psoriasis and more.

Latvia's dermatologists are experienced professionals with an international education and focus on development. Many are members of key industry associations in Latvia and Europe.

GASTROENTEROLOGY

Advanced diagnostic equipment and technologies significantly reduce examination times and improve precision. The variety of treatment options available helps doctors find the right course of action for each individual patient.

Latvia's gastroenterologists can help get to the root cause of digestive problems, reflux disease, stomach aches, vomiting, irregular and painful bowel movements, and unexplained weight loss.

ORTHOPAEDICS

Latvia offers innovative solutions such as 3D-printed casts for treating fractures. These allow a patient's skin to breathe, make it possible to wash and have more flexibility during the recovery period. Clinics are kitted out with cutting-edge tech solutions and

equipment for tomography, ultrasound and other diagnostic procedures. Patients have access to the 3,0T, the most powerful, latest generation magnetic resonance machine in the world.

Latvia's doctors are highly sought after by professional athletes, including ice hockey and basketball players, as well as ballet dancers.

Doctors have practiced at several American and European clinics and are members of the European Society of Sports traumatology, Knee surgery and Arthroscopy (ESSKA), International Society of Arthroscopy, Knee Surgery and Orthopedic Sports Medicine (ISAKOS) and other associations.

AESTHETIC MEDICINE

Aesthetic medicine is available at short notice and at competitive rates. Latvia's clinics are equipped with world class equipment to help resolve numerous skin conditions and carry out unique skin rejuvenation procedures. Less invasive methods are becoming more common as technology advances.

OTORHINOLARYGOLOGY

Since ear, nose and throat conditions are often connected with other illnesses, patients may also be seen by otoneurologists, allergologists, gastroenterologists, audiologists, children's neurologists, paediatricians, children's infectologists and hearing aid technicians to determine the best course of action. Contemporary technology and methods can lessen patients' discomfort.

Latvia's specialists are members of the Latvian Otorhinolaryngology Association and regularly upgrade their professional knowledge overseas.

Clinics are accessible to patients with functional and hearing disorders.

GYNAECOLOGY AND UROLOGY

Specialist consultations can be arranged within two weeks of applying to be seen. Doctors use the latest approaches and equipment to carry out accurate diagnostic procedures and surgery.

Doctors have gained international experience at Europe's leading university hospitals in France, the UK, Italy and elsewhere. Both doctors and clinics are members of major international associations of gynaecologists and obstetricians such as the ISUOG and ISPD.

PSYCHIATRY

Taking a complete break from the patient's usual routine, social circle and environment is a vital step in the effective treatment of psychological disorders.

A group of specialists including psychiatrists, psychotherapists, narcologists, physiotherapists and art therapists apply the latest research-based methodology to produce personalised treatment plans to improve patients' physical and emotional wellbeing.

Latvia's doctors adhere to European guidelines on prescribing antidepressants and other psychotropic medication.

MEDICAL REHABILITATION

Several of Latvia's rehabilitation centres boast unrivalled locations on the coast or surrounded by forests, providing excellent conditions for recovery. Latvia's temperate climate, the energy of the forest and fresh sea air are well known.

At the centres, patients receive treatments to encourage recovery after operations, injuries or periods of illness, as well as tackle chronic illness and boost the immune system as a preventative measure. The centres' psychotherapeutic approach also enhances patients' emotional wellbeing.

The centres are accessible to clients with functional problems and provide accessible rooms, bathrooms and toilets, treatment rooms and gyms, lifts between floors and in swimming pools. Wheelchair users with mobility aids can access the beach via special boardwalks and use the accessible changing rooms.

SPA AND WELLNESS

Latvia is rich in healing mud and sulphur, bromine and sodium mineral waters. Many healing, beauty and rehabilitation treatments embrace natural local resources such as honey, flowers, fresh berries, peppermint and amber. These are used for healing purposes, in medical rehabilitation and beauty treatments.

Both locals and international guests appreciate Latvia's beautiful, bountiful nature and the peaceful setting it provides for rest and rejuvenation.

With a choice of over 600 treatments, Latvia's spa specialists will devise a personal treatment plan for each client. Masseurs, spa specialists, cosmetologists, healthcare coordinators, nutritionists, personal trainers and therapists are on hand.

GenEra

GenEra is an accredited clinical diagnostic laboratory specialised in human DNA testing. It has 17 years of experience in DNA testing for medical reasons, as well as paternity and maternity tests.

The DNA tests can be divided into three groups:

- Standardized medical DNA tests in gynaecology and obstetrics, gastroenterology, infectology and hepatology, oncology, hematology and neurology. These include: celiac risk DNA test, lactose intolerance DNA test, hereditary hemochromatosis, Gilbert's syndrome, Alpha 1 antitrypsin deficiency mutation testing, cystic fibrosis (delta F508 mutation) testing, Crohn's disease, detection of TPMT gene polymorphisms, thrombophilia DNA test. For prenatal diagnostics the clinic offers: fetal rhesus factor (RhD) DNA test from mother's blood, detection of most common trisomias from amniocentesis material, also NIPT Panorama, in collaboration with Natera, USA.
- NGS, if referred by a clinician, Illumina hardware and technology. This method is used in diagnostics (e.g. in patients with a vague diagnosis), including prenatal diagnostics.
- Determining paternity and/or maternity, kinship analyses between two people: siblings, half-brothers - half-sisters, uncles/aunts - nieces/nephews, grandparents - grandchildren, first-degree cousins, great-grandparents - great-grandchildren.

The lab is equipped with modern equipment. From 2014, DNA testing is performed in line with the standard LVS EN ISO 15189: 2013: molecular biological testing of human-derived material.

Sigulda Hospital

Sigulda Hospital is the leading bariatric surgery provider in Latvia. Surgeons Dr Olegs Kozlovskis and Dr Juris Zarinovs perform gastric bypasses and sleeve gastrectomies. Together, they've carried out 2000 weight loss surgeries.

Founded in 1950, today the hospital is one of Latvia's most modern medical institutions. It has separate departments for elective surgery and intensive care, rehabilitation, therapy and diagnostics, as well as an ambulatory care centre and maternity ward.

The Baltics' only Stereotactic Radiosurgery Centre was opened in 2015 for the treatment of benign and malignant tumours with the latest CyberKnifeM6 technology.

In 2020 4K high-quality image resolution laparoscopy equipment was purchased at Sigulda Hospital to have first 4K surgical system in country and have the latest generation of this kind of technology in the world. The sharper, more detailed picture helps improve surgical vision therefore small invasive operations can be performed more accurately, better and faster. The new medical system at Sigulda Hospital is equal and competitive with that used in the US, Germany and Japan.

Latvia Dental Clinic, Dental Estetika

LatviaDental Clinic is located in the most architecturally beautiful part of Riga, referred to as The Golden Mile.

At the heart of our LatviaDental philosophy is to bring health and beauty into clients' lives that builds confidence in their appearance and brings success to our clients. Using state-of-the-art equipment, our skilful team of doctors create individual treatment plans. New technologies allow us create a beautiful smile within 1-2 days, while having a clear estimate of the costs involved.

We have excellent reputation for:

- Teeth restoration and cosmetic dentistry
- Anti-aging dentistry
- Ceramic and composite veneers
- Prosthetic dentistry
- Teeth whitening
- Preventive and holistic approach for all ages

The clinic focuses on preventing various oral diseases. Our multi-disciplinary team helps clients to enhance their natural perfection, preserve their health, youthfulness and bring that little more happiness into their lives.

KIDS Dental IQ educational program:

Our child-friendly program provides inviting and safe environment for our young clients to engage with doctors in a group play-therapy. As a result of fun and educational games children are willing to be treated. Children and parents learn how to prevent most dental problems in the adulthood.

Join our program to keep your teeth healthy until you are 100!

Royal Dent

ROYAL DENT aspires to deliver top quality and efficient service in a comfortable and luxurious setting. Clients care for their self-confidence and the beauty of their smile, and appreciate the ease of communication at the clinic.

ROYAL DENT has been in operation since 1995 when a private sector emerged in Latvia, and the possibilities of research in modern dentistry significantly widened. The team has withstood competition, built an impressive skillset and gained international experience. The specialists have received additional training in Belgium (Brussels), the USA (New Jersey, Wildwood), Italy (Milan), Germany (Berlin, Cologne, Düsseldorf, Hamburg (Meldorf), Switzerland (Lausanne), Denmark (Bornholm, Rønne) and Russia (Moscow, Saint- Petersburg).

Having been based in the coastal resort town of Jūrmala for seven years, the clinic has noted that the Baltic climate is favourable for receiving dental treatment.

Dr Vasaraudze's Private Clinic

The small modern clinic in the centre of Riga has been providing medical services since 1998. Initially, the clinic specialized in gynaecology, but has expanded to offer services for women, men and children. It is equipped with the latest medical equipment and staff can carry out examinations and tests at short notice. The cosy and friendly atmosphere encourages successful treatment and examinations. Highly-qualified specialists develop an individual examination and treatment plan for each client.

The clinic specializes in gynaecological services, with a primary focus on gynaecological endocrinology — menstrual cycle disorders, female infertility, menopausal problems, excess hair, acne, and obesity. Our specialists can also perform fertilization procedures in our partner clinics.

Services offered:

- gynaecology, therapy, maternity, laboratory services
- specialist consultations: family physician - internist, gynaecologist - endocrinologist, oncologist
- diagnostics: gynaecological ultrasonography, ultrasound for pregnant women, I and II trimester foetal genetic screening with risk analysis, breast gland ultrasound, thyroid gland ultrasound, abdominal ultrasound, soft tissue ultrasound, blood vessel ultrasound, echocardiography
- health check for women under 40 (laboratory tests, radiology, cardiovascular system, gynaecological examination, therapeutic examination)
- health check for women over 40 – Premium (laboratory tests, radiology, cardiovascular system, gynaecological examination, therapeutic examination)
- health check for women and couples in case of infertility. The full examination takes two to three days, fasting blood samples are required.

Riga Maternity Hospital

Riga Maternity Hospital is the country's largest and most modern delivery assistance and prenatal care institution with 70 years of experience. The hospital team conducts an average of 6000 deliveries every year, which is roughly a third of all the deliveries in the country.

The Maternity Hospital employs experts with research and clinical backgrounds who apply contemporary methods and use the latest technologies. This has allowed the hospital to achieve significantly higher perinatal care quality indicators than the national average.

Patient care standards comply with the ISO 9001 Quality Management System. The Maternity Hospital/ Riga Stradins University residential programme in obstetrics and gynaecology is accredited in Europe by the European Board and College of Obstetrics and Gynaecology.

Riga Maternity Hospital offers both state-funded and paid, both outpatient and inpatient services: prenatal care, childbirth assistance, neonatal intensive care and postnatal care.

Riga Maternity Hospitals' Admission ward provides medical assistance constantly all day and night to women who are pregnant or in labour.

Your Doctors Clinic

Your Doctors private clinic specialises in innovative infertility treatment. Its highly experienced team is dedicated to achieving the best possible results and develops an individual treatment plan for every patient, based on previous treatment history. The clinic has high success rates in a broad group of patients, including those with previously unsuccessful IVF attempts, complicated fertility disorders and patients who have been declined fertility treatment elsewhere. It has over 15 years of experience treating international patients.

Your Doctors Clinic offers a wide range of donation programs, such as egg, sperm and embryo donation programs. Women receive treatment regardless of marital status or age. The clinic also offers egg and embryo cryopreservation and storage on site.

Clinic's staff uses a vitrification method to freeze genetic material. The method ensures a cell survival rate of over 95% after thawing. The clinic offers a wide range of preimplantation genetic diagnosis (PGD) and preimplantation genetic screening (PGS) programs both as part of a patient's cycle and within donor programs.

Your Doctors Clinic is accredited by the State Agency of Medicines of the Republic of Latvia to perform all assisted reproduction methods allowed by current

Latvian legislation. This accreditation also allows transporting genetic material across Europe, which makes it convenient for international patients.

It is the only clinic in the Baltic region to have received an FDA certificate. It complies with the ISO 9001:2015 international standards of quality management set by the International Organization for Standardization.

Onko

KLĪNIKA

ONKO Clinic

ONKO Clinic's specialists have both clinical and research experience. They consult and examine patients with benign and malignant breast tumours, skin formations, diseases of the gastrointestinal tract, gynaecological diseases and hereditary tumours.

During a consultation, the specialist will provide information on the most contemporary radiotherapy, chemotherapy and target therapy approaches. They may suggest performing broad-profile genetic tests to detect mutations in a particular disease. Such tests can also determine the risk for healthy people or family members of cancer patients to genetically inherit the tumour genes. Blood samples for both genetic and oncology biomarker testing are carried out on site making it easier to get fast results.

The clinic aspires to find solutions even in cases of rare oncological diseases or when the recommended therapy isn't available in Latvia. Staff can provide an independent assessment on the type of therapy offered by other clinics. In case of different opinions, the clinic can arrange a multidisciplinary consultation.

RSU Nuclear Medicine Clinic

The first and most experienced nuclear medicine clinic in Latvia provides a wide range of examinations using PET/CT technology. PET/CT is primarily used in oncology to:

- detect cancer
- determine whether the cancer has spread in the body
- assess the effectiveness of a treatment plan
- determine if the cancer has returned after treatment.

PET/CT imaging is also often used to diagnose cardiovascular disease and neurologic disorders.

Riga Stradins University (RSU) is one of the leading medical schools in the Baltic States. It founded the Nuclear Medicine Clinic with its PET-CT technology for the development of nuclear imaging procedures and technologies. The Nuclear Medicine Clinic meets all European standards and offers a wide range of PET/CT exams using various radiopharmaceuticals.

The RSU radiological research laboratory participates in research on the latest radiopharmaceuticals and provides scientific support to the clinic. PET/CT scanning is performed using radiopharmaceuticals produced in the clinic's cyclotron, that additionally guarantee the compliance of the drug to the individual needs of each patient.

The clinic has formed a stable team of highly qualified professionals with an international background in nuclear medicine.

Services on offer:

- ^{18}F -FDG PET/CT – powerful imaging tool for assessment of cancer and various inflammatory and infectious diseases
- ^{18}F -PSMA PET/CT – for imaging prostate cancer
- ^{18}F -NaF PET/CT – for detecting calcification activity
- oncology and urology consultations
- a second opinion
- a doctors' council - evaluating a patient's medical record and indications for referral to PET/CT exam.

The International Patient Services team can assist in obtaining visas, booking a hotel, transfers on arrival, etc.

 Dr. Lūkina acu klīnika

**Dr. Solomatina
Acu Centrs**

Dr Solomatin's Eye Centre

Dr Solomatin's Eye Centre helps clients free themselves of glasses and contact lenses. Its team of laser and cataract surgeons use three state-of-the-art laser devices on patients of very varied ages. The centre is the only one in the Baltics to perform cataract surgery by laser.

The clinic's surgeons are members of European and American refractive and cataract societies, regularly attending conferences and seminars around the world. The clinic is honoured to be an official Carl Zeiss Meditec reference center. Prof. Solomatin himself is an associate professor at the University of Latvia.

Dr Solomatin's Eye Centre is the leading eye centre in the Baltics. The Baltics' first ever laser surgery for vision correction was carried out here in 1998. Since then, the team has carried out over 15 000 similar operations. Thousands of customers and colleagues in the field of ophthalmology value the clinic's work.

Today, the centre has followers in Latvia, Estonia and Lithuania but Dr Solomatin's Eye Centre has the advantage of years of experience. Another advantage is its close cooperation with leading medical technology manufacturers, providing access to the latest technologies and devices.

Ten minutes is all it takes for a patient to be free of glasses and contact lenses. Vision improves immediately after surgery, but sharpness without glasses reaches 80 - 100 % of the norm on the day following surgery.

Latvian American Eye Center (LAAC)

LAAC is the first and unique model of a private eye clinic in the Baltic States founded by the American Professor John Joseph McDermott in 1993. Since then it has developed into a well-equipped world-class affiliate network offering services to local as well as foreign patients.

LAAC provides services to patients from all age groups starting from infants till elderly and is covering full range of ophthalmology services – diagnostics, ambulatory treatments, surgeries, eyelid plastic surgery, corneal transplantation, laser vision correction and vision correction with implantable lens. Team of 19 ophthalmologists is providing transparent world-class treatment process and guarantees the most appropriate treatment method adjusted to the individual needs of the patient.

Laser Vision correction surgeries are performed with the two newest ZEISS Visumax and MEL90 lasers and patients can choose between LASIK, FEMTO-LASIK, TRANS-EPI (PRK) or SMILE methods.

LAAC is the top choice among the patients due to high-quality treatments, advanced technologies, qualified and experienced doctors, reputation, international recognition, customer-oriented approach, patient confidentiality, friendly environment for disabled people, continual

improvement and most importantly happy previous patients.

Besides the medical services LAAC hosts as a base of the ophthalmology residency program, provides educational training courses, is actively involved in Clinical Trials, owns the Corneal Tissue Bank and provides medical supplies and equipment to industry colleagues.

Clinic of Plastic Surgery

Dr Jānis Ģīlis founded his private clinic in 1992. For 25 years, it has been occupying stable and leading positions among Latvia's plastic surgery and aesthetic medicine institutions. The clinic is one of few private clinics in Latvia where the consultation and administrative rooms are located in the same building as the operating block and recovery area, providing comfort, better access to information and security to the patients.

The clinic employs 25 professionally educated and reliable staff who take care of patients' comfort and wishes.

The clinic has an exclusive location in the centre of Riga where patients can enjoy a beautiful view over the Old Gertrude Church and other architectural masterpieces.

In the words of plastic surgeon Jānis Ģīlis: "A private clinic means holding personal responsibility and never compromising our standards of excellence. In our clinic we provide unique operating and recovery conditions that guarantee the best aesthetic outcome and absolute confidentiality."

Children's University Hospital

Hospital consists of two complex institutions, one in Riga, Vienības gatve, and one in Juglas iela 20, which is the only one specialized children multi-profile treatment institution in Latvia. Every year more than 30'000 inpatients and more than 160'000 outpatients receive medical care services.

Children's university hospital is located in Torņkalns that is 5 km away from the city centre and 8 km away from the airport. It is convenient to use public or private transportation to arrive at the hospital. Parking lots are available in the territory of the hospital.

Specialists of Children's Hospital provide a wide range of treatment and health care in the treatment of complicated and complex illness cases. All the processes in our hospital are organized so that the patient receives the most effective, safe and the best quality treatment and care. It is realized through following the international experience and achievements in medical science and research, and by implementing these principles in the practice.

In surgery the most effective operating notices and methods of treatment are used that are recognized at an international level, such as: laparoscopy, thoracoscopy, arthroscopy, microsurgery and

others, which reduce the risks of complications and significantly eliminate the recovery and rehabilitation period. Complex diagnostic and treatment services are provided through highly qualified and professional support services.

GASTRO Centre for Digestive Diseases

As the largest gastroenterology centre in Latvia, the GASTRO Centre for Digestive Diseases offers a full spectrum of services from diagnostics and detection to treating diseases of the digestive tract. The centre has over 15 years of experience.

GASTRO offers:

- specialist consultations
- comprehensive examinations of the digestive tract (esophagus, stomach, gut, bile duct, pancreas, and liver) or check ups
- colonoscopies and other endoscopies, using anesthesia and modern patient care methods
- a full range of medical manipulations.

Some treatments will require a short visit while others may take up to a day. Some may require return visits to our full day treatment facility.

Treatment results may be recorded, stored and transmitted digitally, if necessary.

Good Life clinic

The cosy premises of the Good Life clinic are surrounded by a beautiful green forest. Highly-qualified specialists use state-of-the-art diagnostic technologies to provide quality medical services.

Gastroenterology is one of the clinic's main areas of focus. The clinic provides both consultations and endoscopic examinations – the gastroscopy, colonoscopy and capsule endoscopy. A traumatologist - orthopedist, urologist, dermatologist, neurosurgeon, and therapist are also available.

Staff place great emphasis on educating their patients. In the words of general practitioner, Dr Sabri Abdul Massih: "The primary task of the doctor is preventive work. There has to be a dialogue, people need explanations on what to do and what lifestyle to lead. Our patients benefit from an individual approach. This is the only way to find the right way for the health and wellbeing of your patient."

ORTO Clinic

ORTO Clinic is the only private clinic in the Baltic States to specialise in traumatology, orthopaedics, spine surgery, rheumatology and sports medicine.

The clinic is a longterm partner of the Latvian Olympic Committee and most of Latvia's leading sports clubs. Many of Latvia's top athletes seek help for their sports injuries at ORTO Clinic.

The team at ORTO Clinic assesses and treats diseases and traumas of the musculoskeletal system through:

- specialist consultations
- diagnostics (tests, ultrasonography, x-ray projection, diffusion tensor imaging (DTI) and magnetic resonance imaging (MRI) with 3,0T which is currently the most powerful magnet available)
- surgery and post-operative inpatient care (three operating theatres, fifteen private wards and an intensive therapy ward)
- rehabilitation and physiotherapy.

ORTO Clinic doctors consult around 40 000 patients and perform approximately 2 000 operations per year with a low infection risk of 0.2 – 0.5 %. The average infection risk at other hospitals is ~2 %.

The clinic works only with certified and leading implant brands and other medical products and technologies

to minimise the risk of infection and ensure the long lasting effects of surgery. A painless perioperative period helps prepare for surgery and increases patients' satisfaction after the surgery, which are essential factors for a positive outcome.

Resort Rehabilitation Centre “Belorusija”

Resort Rehabilitation Centre “Belorusija” is located in the very centre of the Jurmala resort city and is not far from the Gulf of Riga. The health resort offers 160 modern rooms of various categories.

The main focus of the health resort is cardiovascular and respiratory diseases, nervous, and musculoskeletal system disorders.

Treatment and rehabilitation at the sanatorium-health resort are conducted using local natural factors: the unique Baltic climate, peat mud from Kemeris, and our own spring water.

Physical therapy, iatrophysics, salt therapy room, hydrotherapy, paraffin wrap, carboxytherapy and many more procedures are used widely. A particular highlight of our health resort is the 25-metre mineral water swimming pool.

Daily walks along the seaside, an oxygen mousse and cocktails, a fresh juice and herbal tea will help you maximize the treatment effects. Apart from resort therapy, our health resort also offers day-care services.

Attentive and highly qualified personnel, modern equipment, and a pleasant environment will help you relax, rest, and return home full of energy and health.

RU	Moscow	917 km	1.45 hour
NO	Oslo	1006 km	1.50 hour
UA	Kiev	1027 km	1.50 hour
GB	London	2276 km	2.50 hour

THINGS TO DO IN RIGA

The largest and most exciting metropolis in the Baltics, Riga will inspire you.

Architecture from Gothic cathedrals to world-class Art Nouveau, buzzing cafes and bars and delicious dining from haute cuisine to local market produce are all yours for a price tag that will add to the pleasure.

RIGA OLD TOWN

Riga's historic centre is deservedly on the **UNESCO World Heritage** list, and a visit to the captivating Old Town is an unforgettable experience. Wander romantic cobblestoned lanes, admire soaring church steeples and marvel at architectural gems like the House of Blackheads.

ART NOUVEAU

Riga boomed in the early 20th centuries just as Art

Nouveau architecture was flourishing.

Today the city is one of the world's greatest galleries of this style, boasting over 800 Art Nouveau gems. You will be bowled over by the incredible ornamentation of this style, and don't forget to look all the way to the top of the buildings...

MARKET VALUES

Prefer to do your own food shopping? Then venture down to Riga Central Market, an enormous complex of 5 zeppelin hangars offering smoked fish, black bread, pīrāgi, honey, birch sap juice, pickled cabbage and much more in a rollicking, friendly atmosphere.

Or grab a bite at Central Gastro Market that covers half of one of its zeppelin style hangars and features over 20 different caterers and 2 bars.

JURMALA SEASIDE GETAWAY

Just 20 minutes' drive from Riga, Jurmala (Jūrmala) is a seaside resort like no other. If you're looking for fun, there's vibrant life on the beach and in the unique spas, offering a tempting menu of mud packs and massages.

But Jurmala is also a great place to get back to nature, strolling the miles of pine-fringed shore or admiring beautiful timber summer cottages.

TOP THINGS TO DO

Jurmala offers fascinating attractions for everyone from families to singles, and nature lovers to gourmets.

JOMAS STREET

People-watch the diverse crowd on Jomas iela, Jurmala's kilometre-long pedestrian boulevard, a

strip of friendly bars, cafes and restaurants.

LĪVU AKVAPARKS

The whole family will love the dozen slides and other crazy rides at Līvu akvaparks, the biggest water park in the Baltics.

OPEN AIR MUSEUM

Discover Jurmala's fishing heritage at the Open Air Museum and take a stroll through a unique ecosystem of pines at dunes at the nearby Ragakapa Nature Park.

KEMERI NATIONAL PARK

Enjoy abundant birds, animals and plants, sulphur springs, walking trails and unique architectural sites like the grand Sanatorium at unique Kemeru National Park.

SIGULDA AND GAUJA NATIONAL PARK

Less than an hour's drive from Riga, Sigulda is the perfect antidote to big city bustle. Stunning scenery, ancient castles and incredible adventures await you in this natural wonderland.

STUNNING SCENERY AND HISTORY

For centuries, painters, poets and lovers have found inspiration amidst the lovely landscapes of Sigulda, and visitors continue to embrace this exceptionally beautiful part of Latvia today.

Overlooking the picturesque Gauja River in the majestic **Gauja National Park**, Sigulda's forested valleys are steeped in myths and legends.

They are a treat for the eyes in all seasons, especially the autumn when the leaves blaze gold and red.

Sigulda also offers fascinating glimpses into life in medieval Europe. Travel back to the past with a visit to **Turaida Museum Reserve**, home to impressive Turaida Castle as well as Folk Song Hill, a symbol of Latvia's rich musical heritage where timeless pagan ceremonies are held.

Or take in the poetic ruins of Sigulda Castle across the valley and the imposing 19th century New Castle next door.
