Company activities, products and services:

LINET spol. s.r.o. is a major world manufacturer of hospital and nursing beds, gynecology and obstetrics chairs. The company's portfolio includes solutions designed for intensive care, products for regular in-bed treatment and also special beds for old people's homes and long-term care facilities. Moreover, LINET offers smart applications such as Safety Monitor and SafeSense, as well as solutions for gynecology and obstetrics. The LINET range further includes a wide range of accessories such as anti-pressure ulcer mattresses, mobile equipment, healthcare furniture, etc.

LINET is maintaining its position out in front of its competitors in hospital bed manufacture. The firm regularly introduces products and services with innovative features and functions that reduce physical demands on staff, enhance the efficacy of care provided and increase patient comfort. LINET works intensively on developing such products in collaboration with healthcare professionals and respected experts in various scientific fields, enabling the firm to keep abreast of new trends in the area of medical care.

LINET headquarters, as well as its production plant, continue to be based in Želevčice near Slaný, where it has been located since its establishment in 1990. In 2017, LINET opened a new production hall in Slaný. In the fiscal year 2020/21, LINET manufactured and delivered to clients a record number of more than 120,000 beds. The vast majority of production is intended for export to more than one hundred countries worldwide. Since 2011, LINET spol. s r.o. has been a division of the multinational holding organisation LINET Group SE, with registered offices in the Netherlands. In 2016, Borcad Medical became a part of the organisation due to acquisition. LINET Group has 20 subsidiary companies and employs approximately 2800 people.

Company activities, products and services:

Pharmdata is a subsidiary of the largest distribution companies in the field of medicine (pharma) in Europe. Pharmdata provides data services, standards and logistics in the pharmaceutical and medical industries throughout the Czech Republic, partly in Slovakia.

We provide data and services mainly for distributors, pharmacies, hospitals and doctors, but also for manufacturers and stores of medical supplies.

Main goal: to create and maintain basic information in the field of pharmaceuticals and healthcare. Main tasks: unified register of medicines, drugs and medical devices (leading position on the market), unified directory of manufacturers of pharmacies, hospitals and medicines, PDK Lexikon = source of information, catalogs of manufacturers, etc.

At present, company PHARMDATA provides its services to 100% of distributors, 98% of pharmacies, 95% of hospitals in Czech Republic.

Related projects: information integration, standards in a specific area, data services.

We are looking for:

Pharma industry in destination is one of the well-known industries completely comparable to other countries. Our company is interested in liaisons in mentioned field, particularly in suppliers, manufacturers and pharmaceutical distributors, hospitals who are interested in trading merchandise from/to the Czech Republic, eventually in information cooperation. The possibility of a future close cooperation is not out of the picture. One of the main goals of participating in this "mission" is to map out opportunities for our partners (owners, distributors).

I would like to meet following partners, contacts:

We have no concrete partners in target destination still.

ATTENTION! Company PHARMDATA does not trade in goods, only with data and information.

COMPANY NAME: atx automation, s.r.o

Turnover last y (EUR):	/ear	2 000 000 €				

Logo:

Company activities, products and services:

(max. 500 characters)

atx automation s.r.o is a purely Czech private company based in Prague and with a production plant in Žďár nad Sázavou. Under the original name atx s.r.o was founded in 1991 just in this city.

Since its foundation, the company has been engaged in deliveries for automation in industry and is committed to providing turnkey solutions in the following areas:

-automation for automotive industry (45%), automation for the engineering industry (25%), automation for metallurgy (20%), building automation (5%), automation for the food industry (3%), automation for the chemical industry (2%).

Some of the most significant references include, for example, the complete automation delivery for the new factory od T.P.C.A. in the Czech Republic, comprehensive delivery automation lines for the final assembly workshop od KIA Slovakia or a part of the production line for the first electric car od BMW for the production plant in Leipzig. Even the smallest cars from the VW-VW Up and Škoda Citigo concerts are produced on the lines supplied by the atx automation technology for VW Bratislava.

We are looking for:

(distributors, clients, partners for joint-ventures, co-operation, etc.)

In order to capture and participate in these trends, the company also seeks on this mission a suitable partner who is sufficiently financially strong and adequately qualified to address these efforts.

(max. 10 lines)

PROMA REHA is a traditional manufacturer of medical and nursing beds. Family company has operated since 1990 and was the first in post-communist countries to produce fully electrically adjustable beds. The owners, Jakubský familly, keep moving the company forward. In recent years, it has dynamically grown into a stable, strong and technically and professionally advanced company. Thanks to this, today our products are among the world's best. High quality products, professional services and hard work are behind our success.

The production covers medical beds, especially ICU and CCU beds. The portfolio includes also a bariatric bed, ICU beds, or beds for a standard hospital ward. Shower beds, transport chairs and stretchers are also in the portfolio. Our production processes are focused on high quality and durability.

Our family business exports products worldwide, e.g. to Scandinavia, Middle and Eastern Europe (especially Russia), North Africa and the Middle East.

SPACEKNOW SPACEKNOW

Logo:

Company activities, products and services:

SpaceKnow is a Czech based data analytics company utilizing satellite imagery and state of the art artificial intelligence to deliver valuable information for financial, government, agriculture, mining and defense intelligence applications. SpaceKnow enables near real time processing of big data, delivering competitive advantage through actionable insights.

Within Defense & Intelligence, SpaceKnow proprietary software enables analysts to harness the power of data from space. Through our bespoke contracts with multiple commercial satellite imagery providers, we deliver and automatically analyze optical and radar satellite imagery on demand and in near real time. Our Analytics Platform is a universal and scalable software solution configurable to fit specific customer requirements and can be deployed through the cloud or as an on-premise installation at the site of our customer. Through automatic segmentation, classification of military objects, change detection and other advanced features, SpaceKnow enhances the speed and effectiveness of intelligence generation for better decision making.

We are looking for:

(distributors, clients, partners for joint-ventures, co-operation, etc.)

- Clients, mostly from the state sector, but we also do business with commercial entities also, especially within the finance sector and agriculture sector
- Potential partners for our defence & intelligence products i.e. local high-tech IT companies who have previous experience working with Ministry of Defence or specifically with Military Intelligence
